Perfidie
 observe mouvements du corp.
 Tension
 Relachement etc.
 Tres attentif operation de transmission fait decrire a l'autre ce qu'il ressent puis y superpose ses mots sa musique pernicieuse Morbide «danger» «attention»

① Perfidie

début d'identification

②

Angoisse

IDENTIFICATION

③

plasma
 immobile
 Mort

défense caractérierelle apparait
 Angoisse
 Blocage
 mais
 ← l'e. continue a avancer de l'a

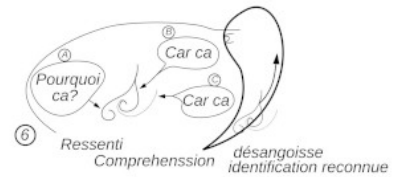

④

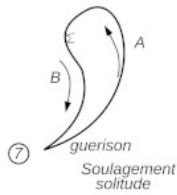

⑤

lien avec société bloqué.
 S'enfonce

identification
 fin

Visualisation A pourquoi je vais mal et suis immobile?
 B car j'ai une sexualité pourquoi je ne la sent pas?
 par quoi, par qui elle est bloquée?
 C Car il/elle, me la imposé de l'exterieur.

⑦

⑧

décrochage

⑧.3

Frappe des poings

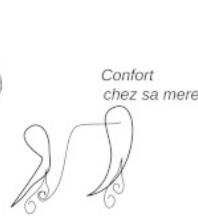

⑧.5

Car n'arrive plus a se nourir de la libido de l'autre, qu'elle a sucée et bloquée en la comentant salement.

⑨

irrational fuite

⑩

distance

⑪

admiration

création d'orgueil
 idéalisation
 Rancoeur
 pousse a la faute
 fanfaronner

⑫

Sangue
 suiveur
 Trahison
 coup de couteau dans le dos

⑬

abandon peu de nouveau bouger
 Haine Concertation etc
 Sourire assuré Satisfaction dans le mépris groupe affinitaire

⑭

attaque immobilisation encercleage animal Confiant sadisme sur chaque mouvement

⑮

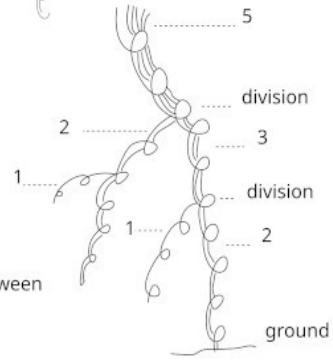

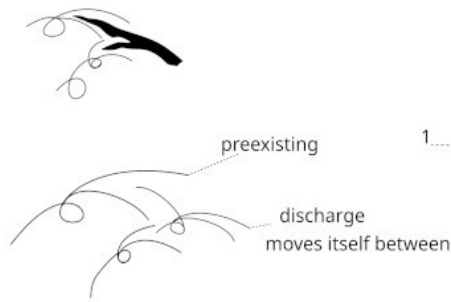

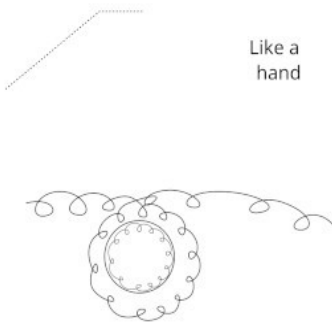

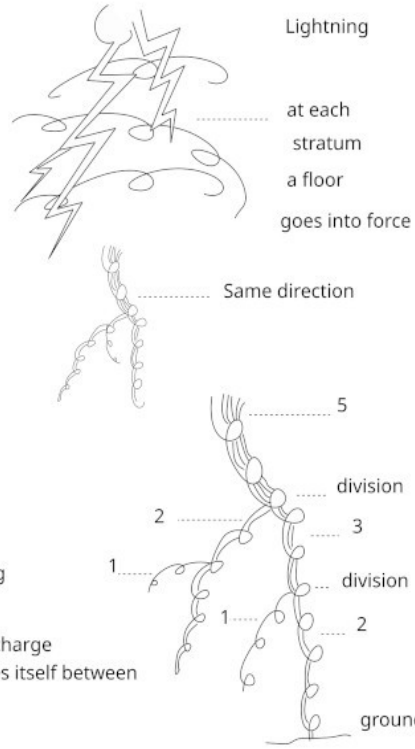

Cauchemard dure longtemps
 stase sexuelle insomnie maladie crise cardiaque
 épuisement les autres se gavent de l'e. dépensé a se débatre.
 perte de poids Rage cherche repos

⑯

'sacrifice' fait inconsciemment dévore les restes société a nouveau égalisée

map of the zone

What it listens put in rythm

Preexisting create the spaces appropriates for the ports on the outskirts

not = digital

= Create a small shifting after having reproduced the specific wave

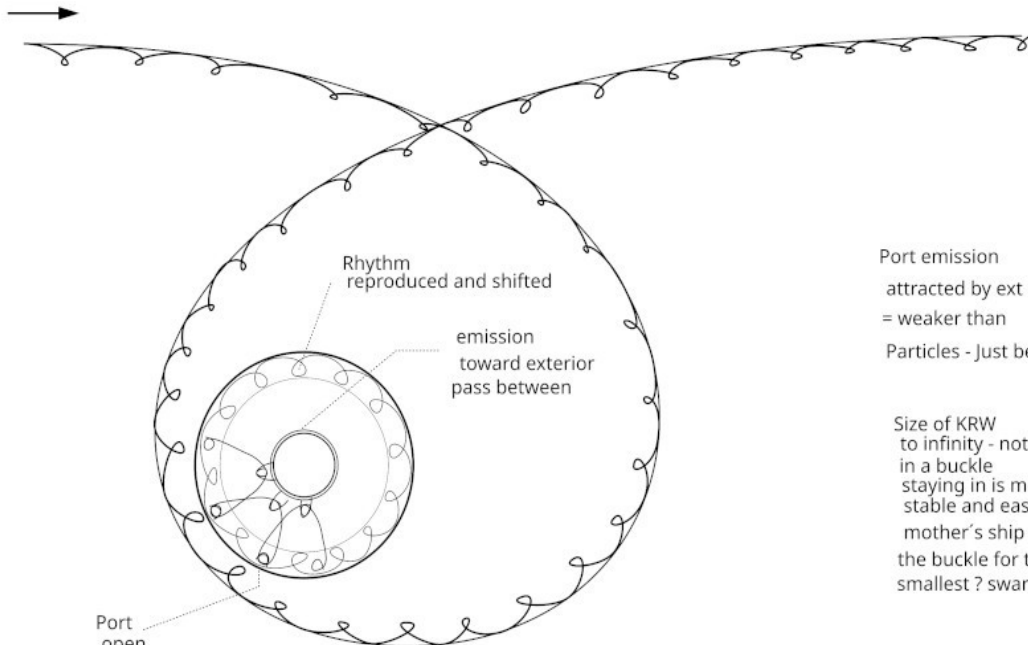

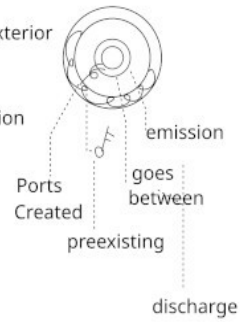

ID Distributors

from the exterior

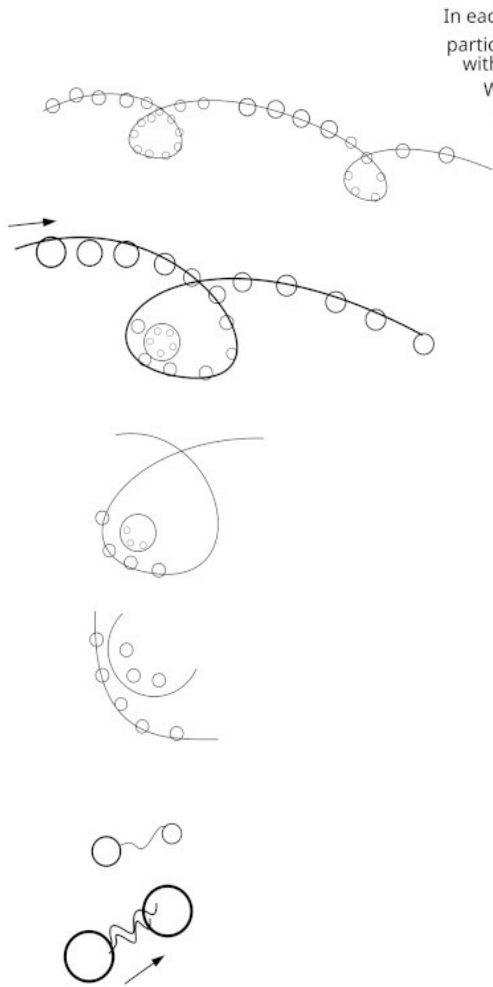

Music

capture psycho observation envy Sexuality love etc imagination

Port emission attracted by ext = weaker than Particles - Just below

Size of KRW to infinity - not always in a buckle staying in is more stable and easy mother's ship producing the buckle for the smallest ? swarm

In each current there are particles, we can hear it with a radio, E balls,

Which move in the KRW a saucer has ports that come into contact with these balls

and the wheel turns manually. each port recharges or discharges at each contact as it where attracted.

To run the wheel, a current in the internal discharge or recharge each port and automatically each port calls a ball of E. from a current, to stick to it.

Good settings and wheel turns. Each port

connected has an battery for general quantity of E. of the object, elevation, ratio gravitation ?

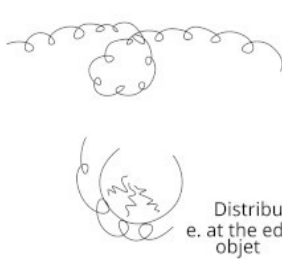

Or the displacement in the KRW is perhaps

Peut être puisqu'ellesufficient since it is already a certain elevation. Then

Then just be able to change of KRW

attracted, reject guiding a mat.

To see them, MAP all the time, currents horizontal to the star and more or less verticals, general currents more distant.

These balls are KRW smaller

Concentration points

R. discovered the distances of them, measurements

(with pendulum)

kept them I believe in any case

loved them very much.

Plate or ball, of orientation, distribution and supplied by E.

Distribution e. at the edge of objet

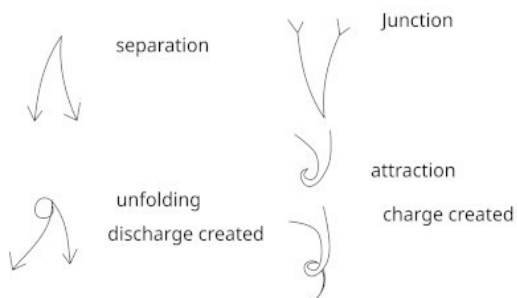

000000

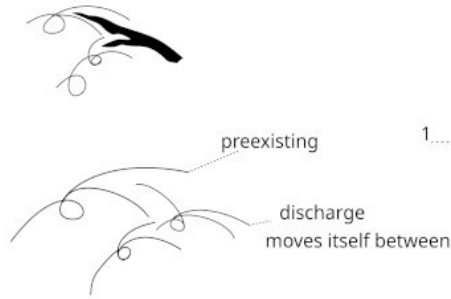

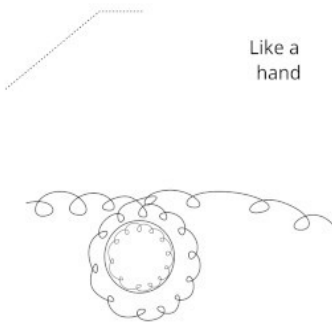

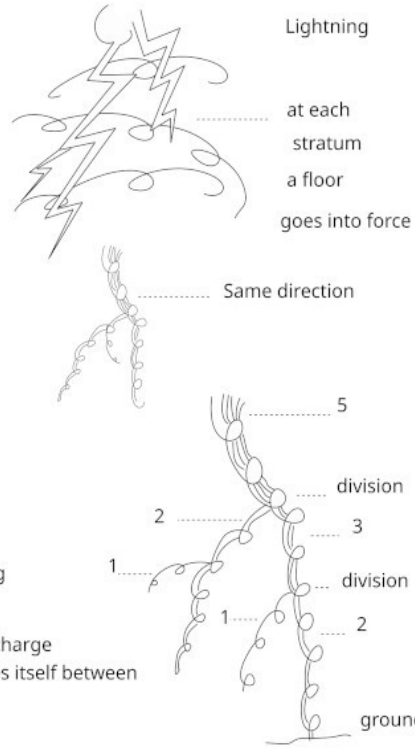

Lacks plasma ball

Matter in the inside no containing . Meca

Equipped with figlet fashionner or other life creator

map of the zone

What it listens put in rythm

Preexisting create the spaces appropriates for the ports on the outskirts

not = digital

Music

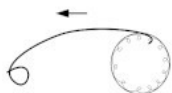

capture psycho observation envy Sexuality love etc imagination

Port emission attracted by ext = weaker than Particles - Just below

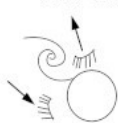

Size of KRW to infinity - not always in a buckle staying in is more stable and easy mother's ship producing the buckle for the smallest ? swarm

Then projection of KRW

tests must be done. Modulate a wave in a circle will make the KRW whether with radar, radio or filter organic metal battery. Then in the center sparks, as a plasma lamp. for example.

other function

To unbind

jet on one side or other of the KRW

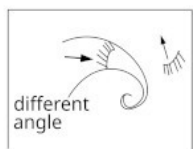

If she is superimposed

attract

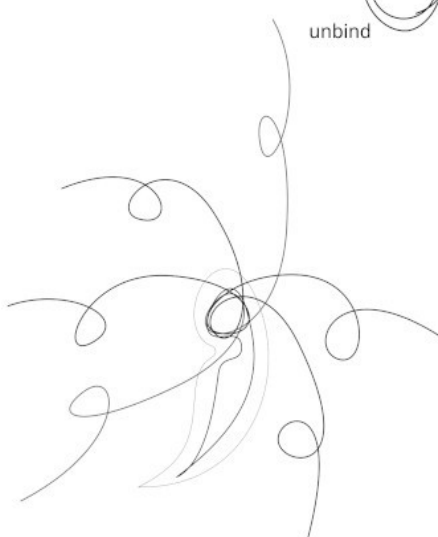

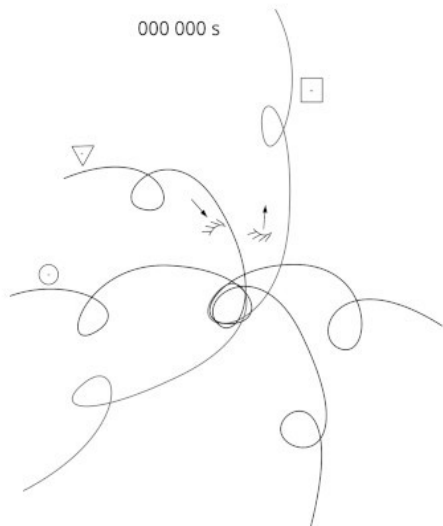

superimpose the KRW

with others, to change way.

Then un-superimpose and follow the second

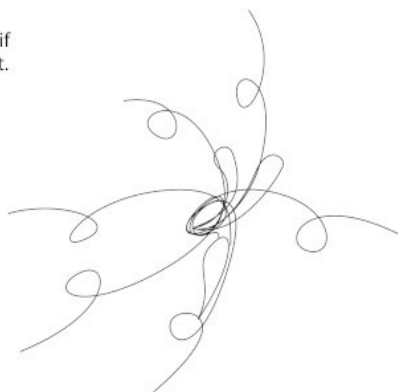

000 000 s

un-sexualize
by understanding
sexuality
unbind swallow

This is what happens during a discussion (blocked in oral)
2 objects following 2 KRW superimpose themselves.
objects can change direction according to the other KRW embodied in the particles of the buckle if it is not tighten, if not in the person who had tightened it. Sometimes there is a 3rd KRW that impede the change sexuality makes non-navigable ways

KRW

Can be tighten

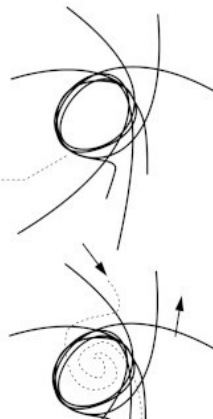

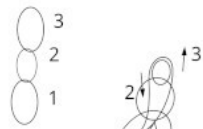

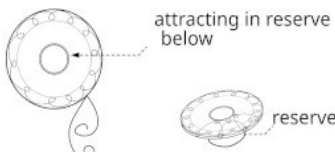

or extend itself

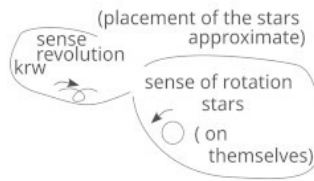

face

Jaw

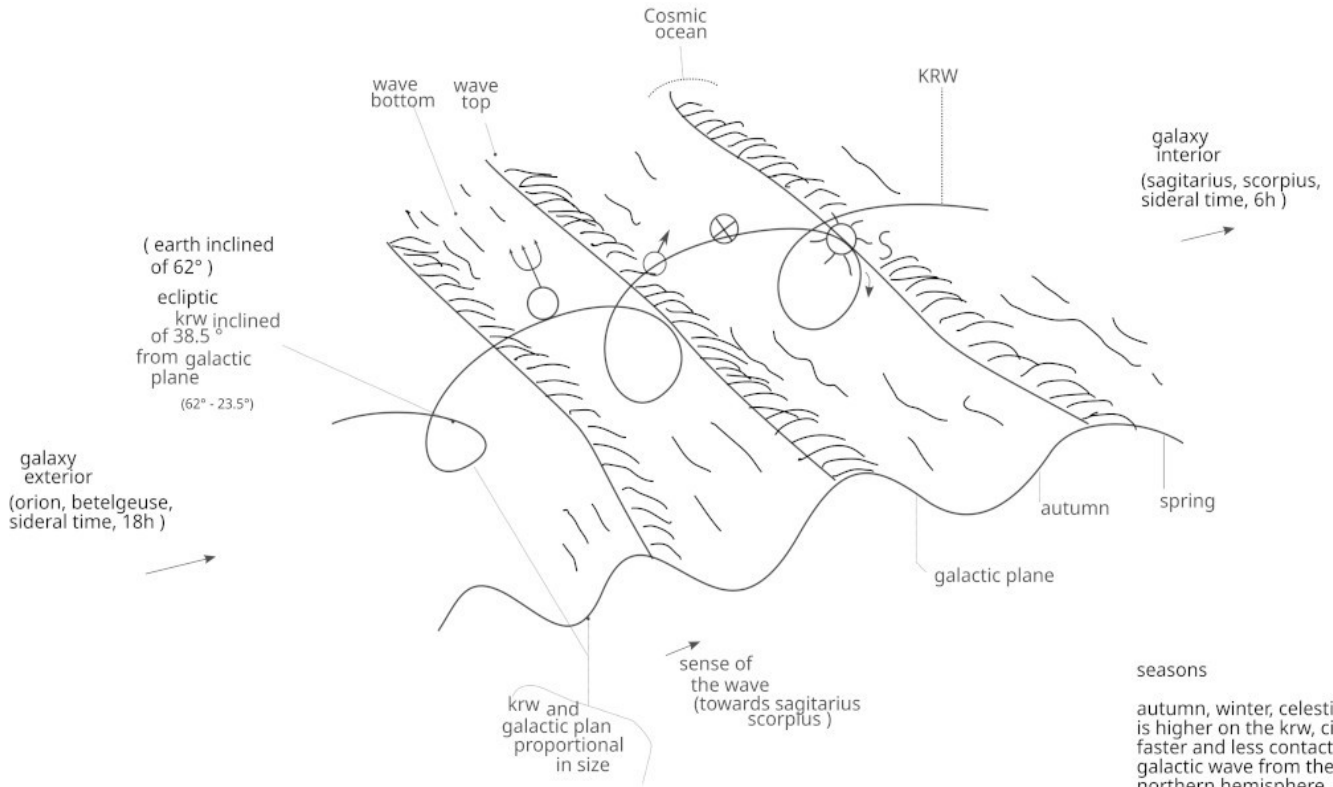

Tighten

1 remove constraint under
2 attract for tighten
3 jet upward

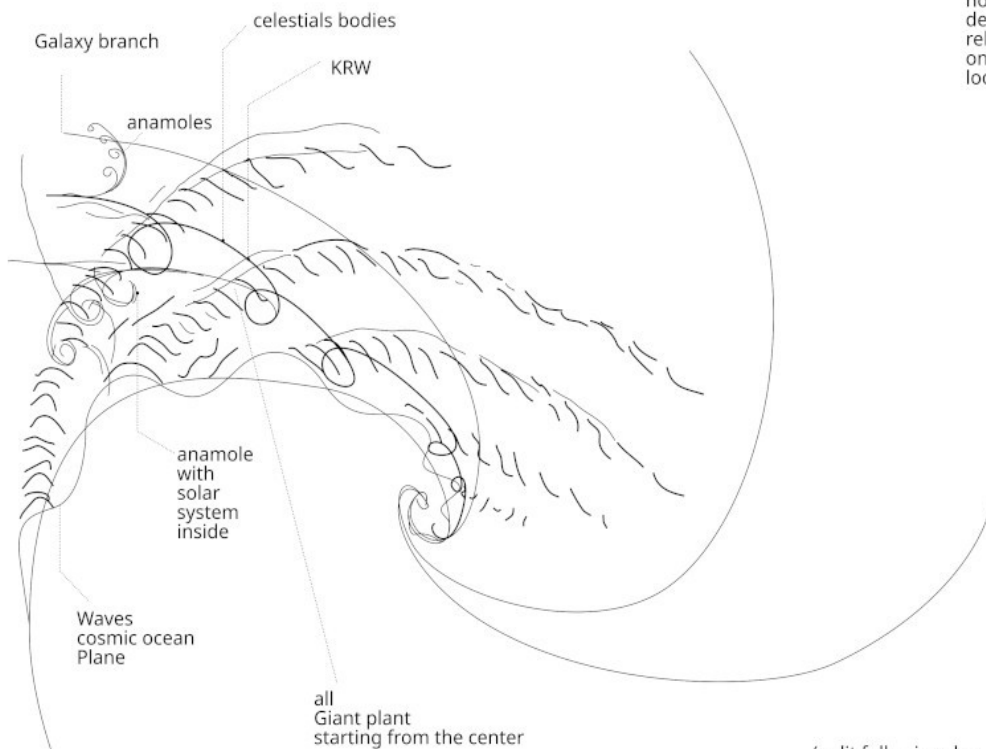

wave bottom
wave top
cosmic ocean
krw and galactic plane proportional in size
sense of the wave
(towards sagittarius, scorpius)
galactic plane
autumn Spring
galaxy interior

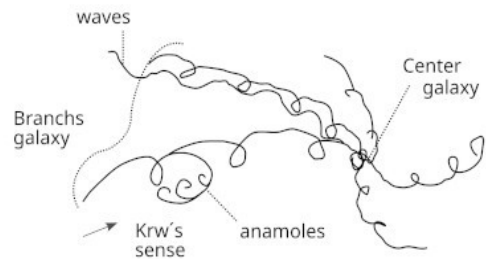

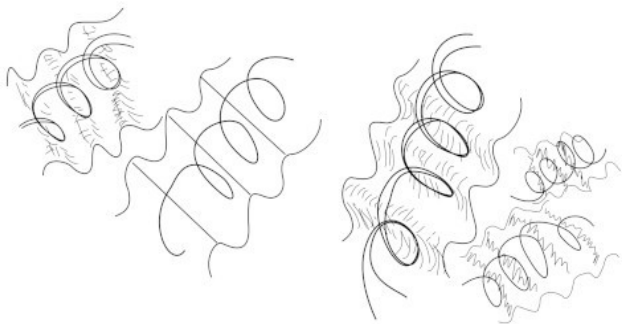

seasons

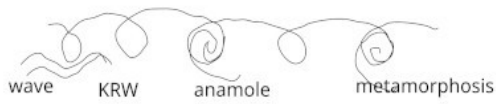

autumn, winter, celestial body earth is higher on the krw, circulates faster and less contact with the galactic wave from the terrestrial northern hemisphere. (sun preceding the earth is below, already in the loop)

spring, summer, celestial body earth in the loop of the krw, pushed by the wave of the galactic plane, northern hemisphere in contact, e. denser, circulates more slowly in relation to the plan. (sun is below, on the acceleration line, out of the loop)

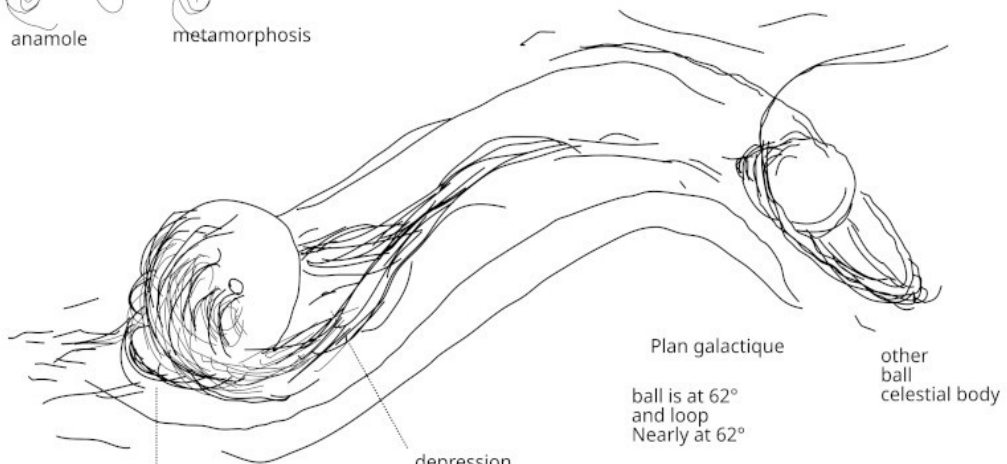

KRW

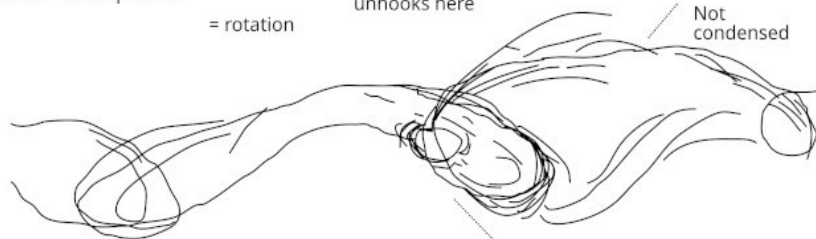

Buckles inclined

Wave's bulges, the wave behind
The celestial body
It attracts its plasma

= rotation

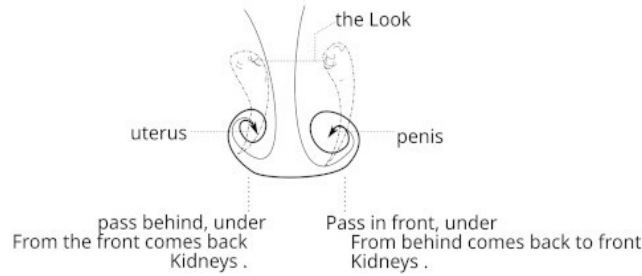

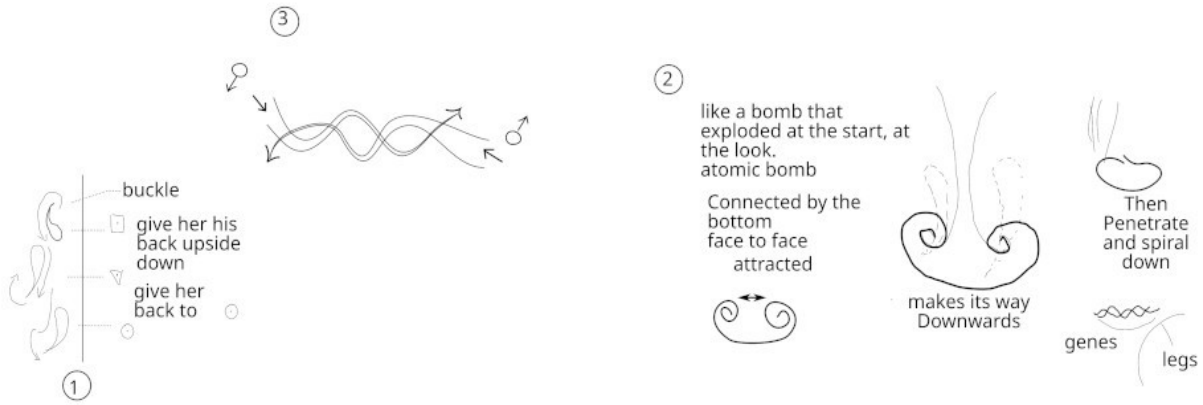

Top of krw
Not condensed

Wave push
Krw from behind
and celestials bodies with

Very condensed
because wave
push
and draw the celestials

Genes from krw, spinewave
= buckles crossing the body by taking the form of it, tightening when mixing with the wave of the partner, charging the embryo as is. Later the buckles will be enlarged again in the newborn. (Those who have been the most charged, circulating, in the partners will be the determining factor of the choice of characteristics present in the gene; the helicoid of two buckled up lines reduced in size in the charged germ.) DNA

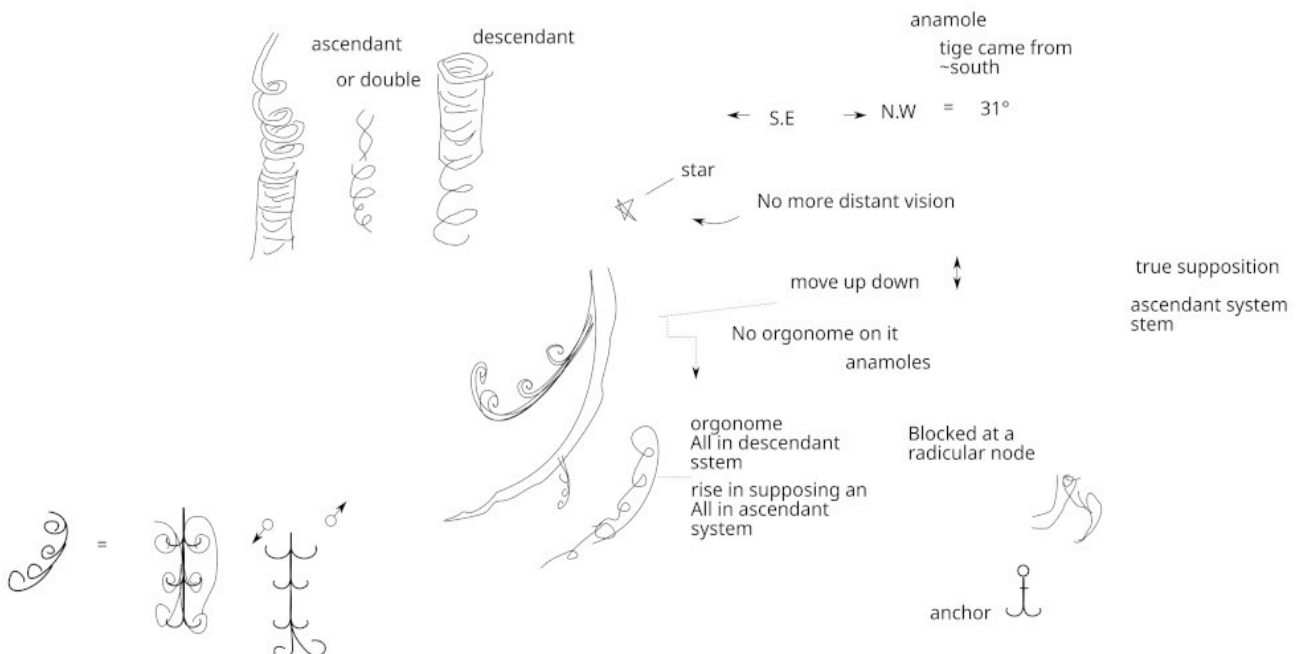

anamole suite
To get it - Life choice, question, ascent cord "ombical" de stasis, by sexual thought with ,imagining it by visualizing my inverse at the pelvis level (as shown a little before) On a vegetal system, testing a theory based on Gaudichaud vegetal description. If the radicules of the leaves descend along the Cambium, behind the bark, that they cover the old woody (and make the growth of the tree) and if they are twisting around the radices of the ascending system (as shown), why do not not to see me in this place, ascending, letting me cover by the descendants to reach a leaf, perhaps, these descendants would be that I would meet by the feet, which, as would be a particle on these waves in the shape of a radice, like the cell browses, travels in the tree.
See the cord, then the previous page figures, then the stem and a knot on it, then the anamole leaf that goes down and swing, without on it.

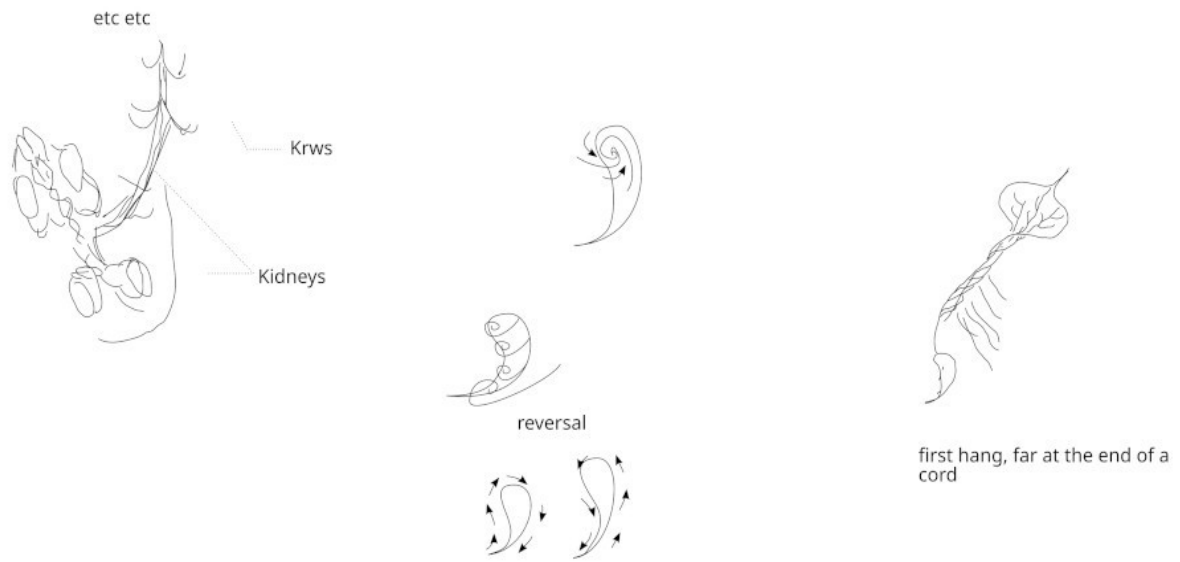

+ bark on one side and on the other or liquor curb, obstacle to the radices.

humanity bark behind I am in the cambium science solitude looking for the sheet, the flower the fruit, want to go out

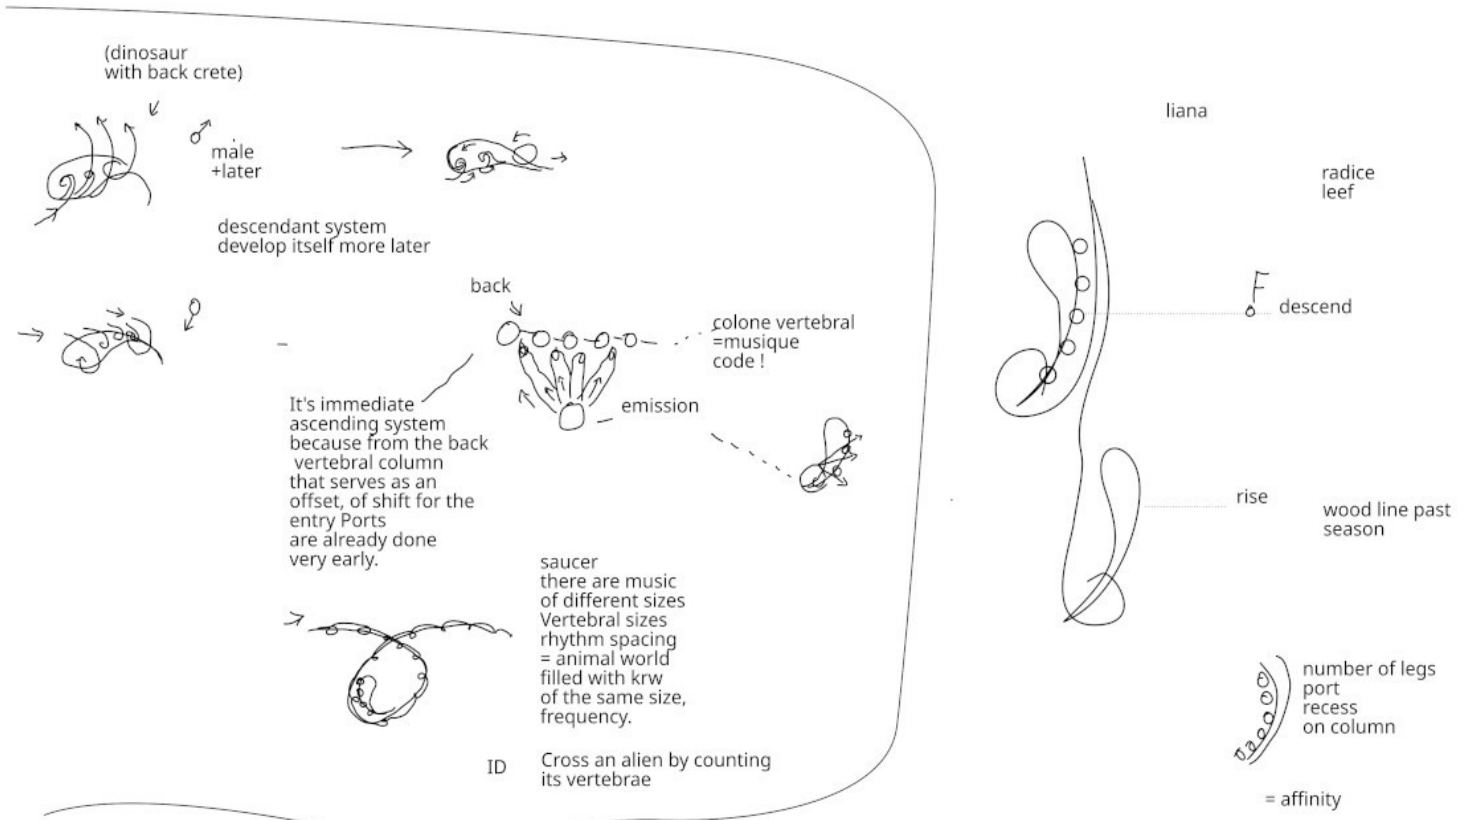

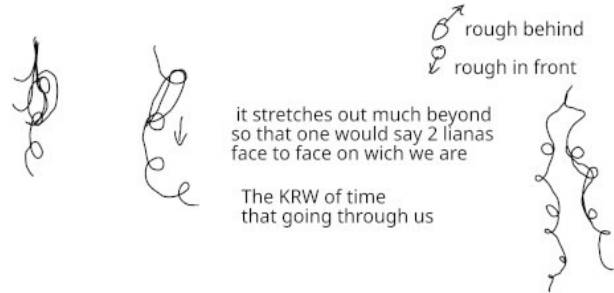

cut the branches to him = death of the parts of the bark

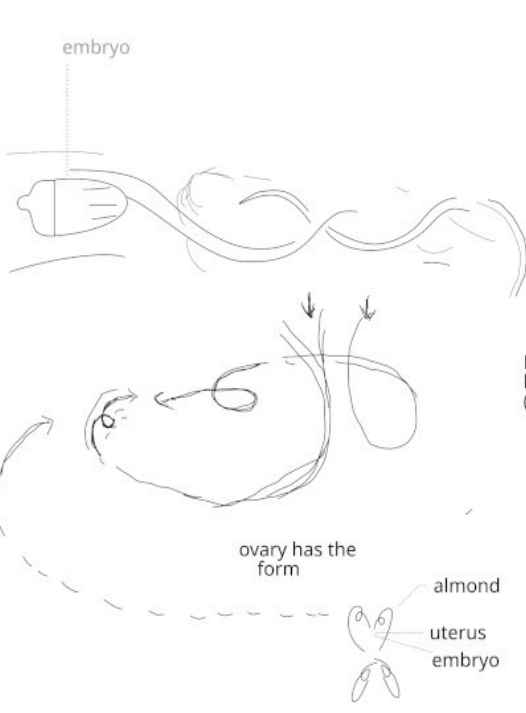

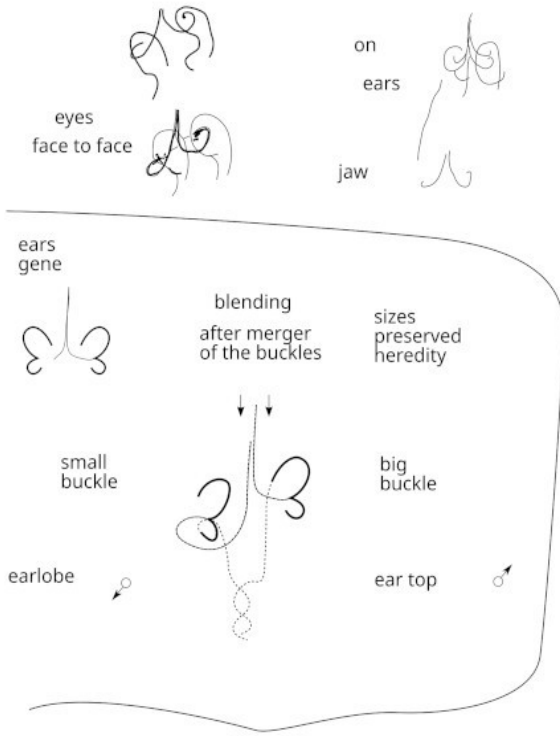

true supposition
ascendant system stem

There are inside, small balls of bitterness, tights. When you start. That is to say let oneself be penetrated. +angst that comes back

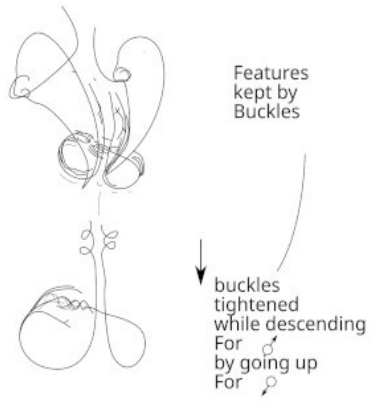

same for butterfly colored shapes and others are organizer of the e., that is to say, obstacles, channeler etc. Where it goes or not. it goes through buckle. (krw)

Once past all the organs the animal is charged to its maximum, if it mates, what comes out of it is the wave that has traveled his body, (coming from outside) taking its form,

Reducing the buckles, tightening them by concentrating, then superimposes (again), with the wave of the other half..

sperm charge the embryo already there and the mixed wave does the rest, i.e., gives Movement

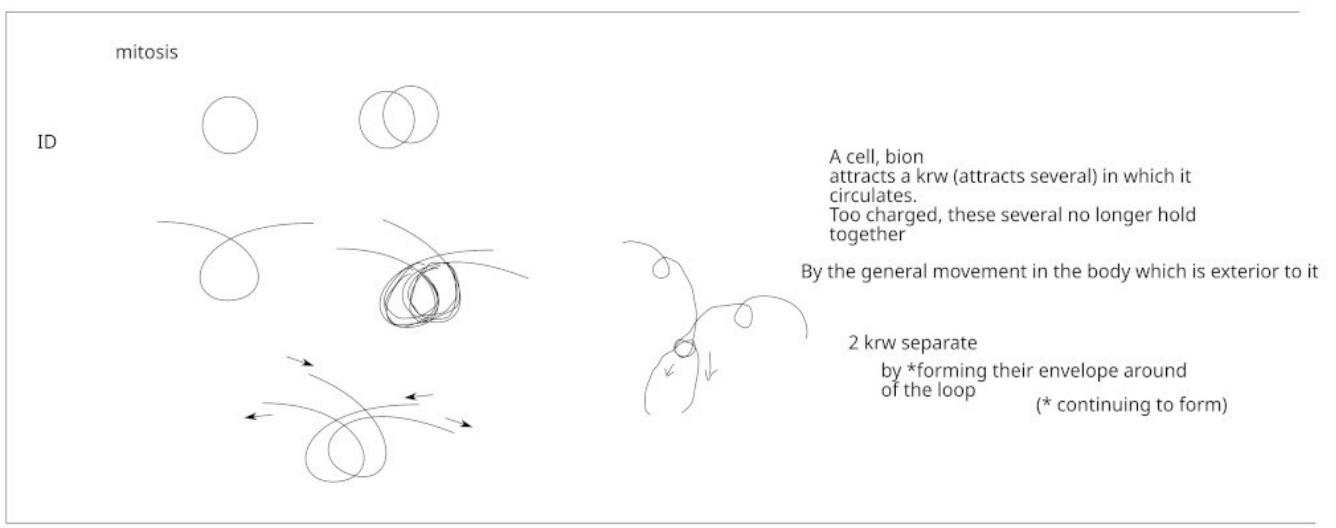

fluants superimposing descending in front of ♂ descending from behind of ♀

"Gene"
ADN
etc

Anteros is a sailor he has an anchor for Navigate in the Caduceus

'meaningful forms'

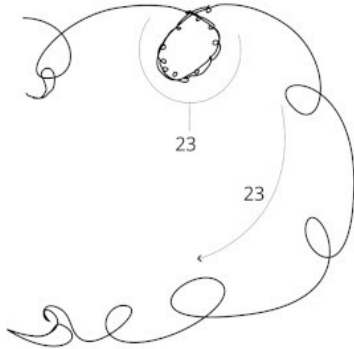

Nbr of "chromosome" = Nbr Vertebrae
 ~ 23 ~ 24

= Nbr of buckles = -----
 ~ 23,5
